

Picture this:

Freeze-dried instant coffee at the bottom of an enamel camp cup, hot water boiled from a Billy, and a dash of communal campsite milk from the cooler.

...*Bean* there, done that.

It's about time you got the best out of your brew beyond your home kitchen coffee setup. While there are some classics we could never cull, we boil it down to what matters most – from portability, durability, and functionality, to compact pack size, limited wait times, and the ultimate caffeination at sunrise!

The following coffee makers are our 2024 best-sellers in facilitating those magical mug moments on the edge of the camp mat. Be it an almost-latte on the lightweight treks or a full-bodied black with one sugar at sunrise – carry the comfort of a home brew with you on every outdoor escape, starting here...

For Brew-ability with Durability

AeroPress Portable Coffee Maker and Go Travel Coffee Press

A bold base camp brew in only two minutes! Credit: AeroPress

The original [AeroPress Coffee Maker](#) and convenient [Go Travel Coffee Press](#) are the perfectly portable and easy-to-use coffee makers for home, work, and the outdoors.

For a bold base camp brew in only two minutes, start by placing the filter in the cap and rinsing with hot water. Fill the plunger with hot water, add ground coffee to the [AeroPress](#), stir, and plunge! Micro-filtered too, this coffee maker produces smooth, rich, and grit-free coffee, both BPA and phthalate-free for your peace of mind.

The [AeroPress Go Travel Coffee Press](#) boasts a space-saving, easy-to-clean design, taking compact coffee brewing to a new level. Go big on brew without the bitterness, and enjoy 1-3 cups of hot coffee in a minute and cold brew in under two! The entire unit including accessories is designed to fit inside the mug, doubling as a carry case that fits snug in your rucksack, travel pack, or desk drawer.

For the Bolder Brews

Wacaco Nanopresso Espresso Machine and Barista Kit

Sans the milk wand, the innovative Nanopresso delivers a full-bodied brew on those lightweight adventures. Credit: Wacaco

Pat Benatar once said 'hit me with your best shot' – so Wacaco introduced this fully equipped espresso machine!

Sans the milk wand, the innovative [Nanopresso](#) delivers a full-bodied brew on those lightweight adventures. With optional accessories for adapting to both ground and capsule coffee, this gadget is both ergonomic and lightweight in design – sitting comfortably in the palm of your hand and snug in your camp kit. It's capable of reaching up to 18 bars of stable pressure during extraction, guaranteeing top-quality, rich espresso on the rocks. An 80ml water tank paired with the efficient filter design also ensures fuss-free maintenance.

The Nanopresso [Barista Kit](#) takes portable coffee at the campsite to another platform, bundling even more kit bits into the handheld, ergonomically designed pod. With a 140mL water tank, a larger espresso cup, two double and one single espresso filter baskets each with a cap, a double espresso adapter ring, tamper, and instruction manual – the Barista Kit is the portable coffee cart catering for however you take your cuppa. Your compact short black contraption, the Nanopresso delivers prime espresso beyond the matt black café table.

For the Campfire Coffees

Campfire Enamel Coffee Pot 2L

Experience the rustic, pared-back way of the outback – like coffee on the campfire. Credit: Campfire

Barista-style brew beyond the cafe bench is really something – but there are reasons why we camp, and one of them is to experience the rustic, pared-back way of the outback.

Like coffee on the campfire!

The [2L Enamel Coffee Pot from Campfire](#) boasts an enamel-coated steel construction with a stylish speckled finish and a side handle for easy transferring. Its spout ensures a neat pour, with a handle on the lid for checking the progress of your hot water.

For the Capsule Cuppas

Wacaco Minipresso NS and GR Espresso Machines

Enjoy liquid gold from a coffee capsule on every outdoor getaway. Credit: Wacaco

The only thing that should feel the pressure of achieving top-quality coffee at camp is your coffee pod... and maybe your ears, if you're camping high enough in the mountaintops.

The [NS Minipresso portable espresso machine](#) takes Nespresso® original capsules and those alike, having it both convenient and mess-free for those alfresco cuppas. Producing up to 45mL of espresso, simply pop a compatible capsule into the head outlet, add hot water to the water tank, unlock the piston, pump a few strokes to pressurise it – and enjoy liquid gold on every outdoor getaway.

The intuitive [GR Minipresso](#) unit is equally as easy to use. Add ground coffee into the filter basket, apply light pressure to level out the grind, and pour hot water into the tank. The next steps mirror that of the NS, producing up to 50ml of espresso that fills the built-in cup for that convenient coffee fix off the grid.

For Compact Cooking

GSI Outdoors Mini Espresso Maker (Single and 4-Cup)

This coffee maker fits the bill for the coffee fiends of the field! Credit: GSI Outdoors

For a piping hot cup at your next hiking spot, the [Stainless Steel Mini Espresso Maker](#) from GSI Outdoors is designed to be lightweight yet rugged.

Capable of brewing up to four double shots in minutes, it fits the bill for the coffee fiends of the field! Its rugged 18/8 stainless steel construction has it bearing the rough and tumble at the bottom of the pack, fitting snugly in your hiking rucksack or with your camp kitchen kit. This compact coffee cranker is also available in a [4-Cup set](#) and, at 233g, is weightier than others mentioned in this blog – but true coffee addicts will bear the extra load for a quality cup of a joe!

For the Classic Cups

Avanti Classic Pro Espresso Coffee Maker (*move to the bottom*)

Stylish and traditional, this percolator overdelivers on those coffee dates with the sunrise. Credit: Avanti

For a traditional, full-bodied beverage at daybreak, the [Classic Pro Espresso Coffee Maker](#) by Avanti overdelivers on those coffee dates with the sunrise.

With a classic and stylish cast aluminium construction, this maker is the two-part coffee cart delivering hot, bolstering brew from camp stove to cup! A stay-cool handle and an easy-pour, drip-free spout blends functionality with convenience in an ergonomic model producing rich, traditional-style, Italian-vibe espresso!

This is the percolator we recommend you stay in touch with after every coffee catch-up.

For Those Campfire Conversations

Campfire Coffee Percolator 6-Cup

Your steaming stimulant from the comfort of the summit. Credit: Campfire

Offering your steaming stimulant from the comfort of the summit, you'll want to be the first camper awake at daybreak with this coffee kit!

Thanks to its two-piece percolator system and precision parts, enjoy easy, efficient brewing – and with a 6-cup capacity, fix up fresh brew for the whole crew! A seamless, stainless-steel construction and wooden handle offer durability and exceptional percolator performance for warmer mornings by the campfire coals.

Featuring a stylish glass seeing knob too, [this percolator](#) is for the true coffee front men and women of their camping band!

For the Ultralight Drop

GSI Outdoors Ultralight Java Drip

Delivering those magic mountaintop moments in a mug, bar the bulk! Credit: GSI Outdoors

For a taste of the trail, without the tedious setup – the [Ultralight Java Drip](#) by GSI delivers

those magic mountaintop moments in a mug, bar all the bulk!

Boasting compact, lightweight, and low-profile designs, the Java Drip bodes well for convenient packing and easy storage on every lightweight escape. Made of nylon and polypropylene for a featherlight 11-gram weight, this dripper also features sturdy legs that adapt to almost any mug independent of the unit, designed to hold the drip cone above your coffee.

It's about time you got the best out of your brew beyond your home kitchen coffee setup!
