

## Care Instructions -

1. Ensure guy ropes are out at all times during use
2. Never pack your tent away wet. If you must take your tent down when wet, ensure that it is dried completely as soon as possible to prevent mildew forming
3. If mildew does form on your tent, wash off with warm water and a soft brush to prevent further growth, do not use soap or detergents
4. Do not use an open flame inside your tent. The fabric has been treated with a fire retardant but is in no way fire proof
5. Clean all pegs and poles before storing
6. This tent is not designed to withstand storm conditions. During strong winds, it is recommended that the tent be taken down
7. Do not leave your tent pitched unnecessarily for extended periods of time, UV light damages the fly and will shorten the life of your tent

## Condensation -

It is important that lower vents are opened at all times to reduce the risk of condensation. During humid or damp conditions, it is recommended that inner door covers are opened to expose the mesh layer to allow additional airflow throughout your tent.

Do not use foam swabs or non bonded mats directly on the tent floor. This will cause condensation between the mat and floor and if not dried out can lead to mildew foaming.

## 2 Year Tent Guarantee -

**Please take time to read about the protections we offer you**

All our tents come with a guarantee designed to protect you as our valued customer. Flow Imports Ltd, the makers of Zempire Camping Equipment tents, will repair or replace this tent, at their discretion should it fail due to faulty materials or manufacture for a period of 2 years from the date of sale.

The Guarantee is subject to the following conditions:

1. The Guarantee only applies to an original purchaser who purchased this tent from an approved retail outlet
2. The Guarantee does not apply if the tent has been used for anything other than reasonable personal camping use. Commercial use (e.g. rental) or continuous use as a residence are expressly excluded
3. Damage due to normal wear and tear, accident, acts of God, negligence (other than by Flow Imports Ltd), failure by the purchaser to ensure instructions for setting up and care are observed, deterioration due to abnormal exposure to ultraviolet light, insect or mildew attack, or any other cause reasonably beyond the control of Flow Imports Ltd are not covered
4. If redress is sought under the terms of this Guarantee, then the tent must be returned by the purchaser to the outlet from where it was purchased within the Guarantee period, in a clean, dry state and with proof of purchase
5. All transport costs and any other indirect costs are excluded from the Guarantee.
6. Flow Imports Ltd reserves the right to make a reasonable charge for repairs which it determines are not within the scope of the Guarantee
7. The Guarantee does not limit, modify or exclude any rights under any law if doing so would contravene that law or make any part of this Guarantee invalid. However, Flow Imports Ltd:  
**a)** excludes (to the extent permitted by applicable law) all conditions and warranties that might otherwise be implied; and  
**b)** limits its liability for breach of any such condition or Guarantee that it cannot exclude together with its liability under the Guarantee, to repairing or replacing the Goods or paying the cost of having the Goods repaired or replaced (at Flow Imports' option).

This tent has been made with meticulous care and attention to detail. Providing it's properly looked after and correctly stored, it will help you enjoy all that nature has to offer for years to come.

Get out more - you owe it to yourself.

# ROOF COVER

## LITE SERIES

- 1 Test run**  
Practice attaching your roof cover at home to ensure you understand the process
- 2 Understanding the conditions**  
Your roof cover is designed to reduce the temperature inside your tent and also extend the life of your tent fabric from UV degradation. It is however important to understand that while your roof cover is designed to perform in most conditions it is not designed to work during very windy and stormy weather. During these times it is recommended that your roof cover is removed to prevent damage to your cover or tent.
- 3 Unpacking**  
When you take your roof cover out for the first time take a moment to see how it is packed or take a photo on your phone. This will help you when it comes to packing your tent away. You will notice gold coloured hooks at the rear of your roof cover and bright green hooks running along both sides. The silver lining of the roof cover should face down towards the tent roof.
- 4 Pull Over**  
With someone holding each end of the roof cover pull it over your tent with the silver side facing down. Be careful not to catch the steel hooks on the tent fabric. If you are able to reach each end of the cover when pulling over, attach guy rope to the loops at either end and pull over using these.
- 5 Hooking On**  
Attached the steel hooks through the loops found above each of the rear anchor webbings. Working around the roof cover, attach the plastic hooks onto the bright green webbing loops sewn at the top of each pole line. Tension to remove any slack.
- 6 Guying Out**  
Guy out the front of the roof cover. The guy lines should sit at a 45° angle. The front elastic gusset should be pulled over the front pole.
- 7 Packing down**  
It is important that the roof cover is removed before packing down your tent. This will help ensure that no condensation is trapped between the two layers. It will also help when pitching your tent next time.
- 8 Rolling away**  
When rolling your roof cover away lay the bag down beside the cover and fold to be 3/4 of the bag length. It is a good idea to fold the roof cover so that the webbings and hooks extend out past the fold. This will ensure they do not catch and tear the fabric when opening out.

Ensure that your roof cover is dry when packing away to prevent mildew. If you must pack your roof cover up wet, hang out to air as soon as possible, mildew can develop within a few days.
