Top Gazebo Tips:

- If the weather conditions are looking a bit dicey, consider adding some solid walls to provide a barrier between you and the elements. Or, if mozzies and flies are a problem, mesh walls will give you some peace inside your shelter.
- Always remember to take the canopy off your gazebo before you pack the frame away. This protects it from pinching in the struts and prevents any unnecessary wear and tear on your gazebo.
- If you're going to set up on bitumen or gravel, it's a good idea to use sandbags or a base pod kit to anchor your shelter for added stability.

These are the gazebos that have shown themselves to be the best in their category. But are there any other contenders that you reckon can bump our top picks?
