

## Elemental Emergency Survival Bag

**\$9.90**

### Details

Mother Nature sure is spectacular, but she can be a tricky mistress - which is why you've got to prepare for the worst. You're going to need things like a compass, multi-tool, first aid supplies and an emergency bag for warmth - like this one from Elemental.

A product like the Elemental Emergency Bag is essential to keep on hand should the weather become extreme as it helps to prevent or treat hypothermia. This is because it's made from silver aluminised polyester, so it'll retain radiated body heat, and its reflective properties make it useful for making signals. Windproof, waterproof and very durable - this bag will help you battle the elements should you find yourself in a sticky situation.

It's also useful for when you need the extra warmth and protection over your sleeping bag if the weather turns unexpectedly. The compact size and ultralight weight means it's not going to take up room in your pack, so you haven't got an excuse not to include one in your emergency kit.

Ultra-light and compact  
Silver aluminised polyester  
Reflects and retains the majority of radiated body heat  
Durable, windproof and waterproof  
Useful in the prevention or treatment of hypothermia  
Can be used over or inside sleeping bag for added protection
