

Petzl
**Tikka Hybrid Concept
Headlamp Red**

~~\$59.95~~ **\$45.00**

Details

There is nothing worse than misplacing your headlamp in the middle of the night and having to locate the loo or rustle up a midnight snack using your night vision. Enter the Petzl Tikka. It's glow in the dark so you'll never need a fumble for your light in the dark again.

Sporting up to 200-lumens of brightness, this headlamp provides three lighting modes - proximity, movement and distance vision plus red vision which will preserve your night vision in the dark. The Tikka has two power options: you can use it with the three standard batteries it comes with or you can purchase a separate CORE rechargeable battery.

The Tikka has a long burn time, so it'll light your way in the dark on many open-air expeditions before you have to change the batteries. Reliable, bright and easy to use - the Tikka is perfect simple headlamp for the hiker, camper or outdoors person.

Glow in the dark reflector
