

Spot
Gen3 Satellite GPS
Messenger

~~\$239.00~~ **\$199.90**

Details

Got a rugged adventure planned? Before you strap on your pack and boots and take off, make sure you have a device like the SPOT Gen3 from SPOT to give you a line of communication on your trip.

The Spot Gen3 uses satellite technology which allows you to communicate outside of the boundaries of phone service. In an emergency, the SPOT Gen3 has an S.O.S. function that when activated alerts the GEOS International Emergency Response Coordination Center who will send your GPS coordinates to your local response team.

The check-in button allows you to send a pre-programmed text message to your friends or family as well as your location when you're out of range, so they know that you're okay. These tracking waypoints can also be integrated into a SPOT Shared Page or Adventure account that allows your friends and family to view a protected web link that shows your waypoints in near real time.

You can also set up a custom message before you leave along with your GPS location, so you can stay in touch with your loved ones when you're away. If you get yourself into a non-life-threatening situation, the help feature will alert your contacts that you need help, and they can get help sent your way. Be safe on your next trek with a SPOT Gen3 tracking your location as you go.

Please note - requires a paid subscription for service, head here for more info

- S.O.S. function
- Check-in button
- Custom message feature
- Help function
- Tracking feature

Activating the SOS function alerts the GEOS International Emergency Response Coordination Center

Vibration rated Per SAE J1455

Please note: GPS accuracy degrades at Mach1 or somewhere in the vicinity of 1235 Km/hr!

Specifications

Snowys Code:	139239
Supplier Code:	SPOT3
In Use Dimensions:	8.72H x 6.5W x 2.54D cm
Packed Dimensions:	8.72H x 6.5W x 2.54D cm
Material:	Rugged Plastic
Waterproof:	IPX7 - Submersible to 1 metre for 30 minutes
Batteries:	4 x AAA Lithium Ultimate Included 4 x AAA NiMH Rechargeable 5V USB
Run Time:	With 100% view of sky - SOS: 13 days Tracking @ 60 minute intervals 24hrs/day: 52 Days
