

Vango Nevis 300 3P Hiking Tent

~~\$249.00~~ **\$199.90**

Details

With enough space for three, protection from the elements, and at an affordable price - the Nevis 300 3P Tent from Vango is a stellar option for lighter trips. The external frame allows for the inner and fly to be pitched together or pitch the fly first and attach the inner after. This tent has a tunnel design which will give you good performance in the wind. The Nevis features a breathable solid polyester inner, a durable 6000mm rated floor, and a 70D Protex 3000mm rated fly to keep out the elements - so it provides reliable protection. To create a watertight seal, the seams on the fly and groundsheet are factory taped and the alloy poles combined with Vango's Tension Band System offer a durable and light structure. The O-shaped doors are easily opened with one hand and the top of the vestibule zipper is protected by a storm flap to minimise water dripping too far into your storage space. Three mesh panels in the inner tent provide ventilation for the sleeping area whilst storm covered vents on the ends of the flysheet allow for airflow to the outside. For gear that you need close during the night, there's a divided storage pocket in the tent for organisation. The tent bag also has an oversize opening plus compression straps to make packing it up a breeze. The budget-friendly and reliable Nevis 300 3P tent from Vango will keep you sheltered on your lightweight adventures. Fly and inner can pitch together. External frame allows for 'fly-first' setup. Tension Band System provides excellent stability. Factory taped seams on fly and groundsheet. Breathable polyester inner. O-shaped inner doors for one-handed opening. Internal storage pockets. Tent bag has oversized opening for easy packing and compression strap.

Specifications
