

Smarttek Hot Water System Filter

~~\$39.90~~ **\$29.90**

Details

To use your existing Smarttek hot water system with water from a river, creek, dam or bucket of water - you'll need a Water Filter from Smarttek. This 200-micron filter will stop debris and gunk from getting into the separately available Smarttek6 smart hot water system when you use it with a water source. It's easy peasy to install, you just need to connect the filter to the water inlet valve on your Smarttek6 hot water unit and you're good to go. 200-micron Simple to install and use Compatible with separately available Smarttek6 smart hot water system Pump water through your hot water system from external water source
