 135 cm

Details

When you're blazing along the trails, the Micro Trail Pro Poles from Leki are the premium choice for lightweight support. These poles feature the brand's newly designed Shark Frame Strap which is different from your standard strap. It's made from highly breathable mesh material which encloses your hand securely and is larger for better support. The shafts are made from 100% highly modular carbon which is super durable while keeping the weight down. For ergonomic comfort, the Micro Trail Pro has a natural cork grip and a Thermo grip extension for better flexibility on steep terrain. The tip is optimised for trail running as it's alignment-free, has a concave spike for foothold in each angle and provides you with the optimum swing. Best of all, the push button allows these poles to be folded up to just 37cm in a jiffy. On fast and light missions, you can lean on the Micro Trail Pro Poles from Leki. Ideal for trail running and lightweight hiking 100% highly modular lightweight carbonFolding design, with a tiny packed size of 37cm Trigger Shark 2.0 System Shark Frame mesh strap Breathable, secure and enclosed mesh strap Trail running tip - alignment-free, concave spike for foothold in each angle, optimum swing action Not adjustable, but available in a range of sizes
