

Zempire Aero TM Pro Roof Cover

\$89.99

Details

Put an Aero Tent Roof Cover on your Zempire Aero TM Pro to reduce the heat inside your tent as well as protect it from UV damage, bird droppings and tree sap.

This cover is made from material that's fire retardant, UV treated and has a silver coating. This can reduce the temperature inside your shelter by up to 6° on warm days, and condensation inside your tent on cold nights. This cover also provides added protection when the weather turns sour.

You won't have to fuss with complicated fasteners, as this cover is easy to put on, and the webbing attachment will stop it from moving about in the breeze. To give your tent added protection from the elements, throw on an Aero TM Pro Roof Cover.

SPF 50+
6000mm rated
