

Zempire  
Aerobase 2 Shelter + Wall

**\$449.99**

### Details

Instead of struggling with a clunky metal frame when you're setting up shade outdoors, pack an inflatable shelter like the Aerobase 2 from Zempire. Ideal for when you need shelter for markets or smaller campsites, this model has an inflatable pole design with a single point for inflation and deflation to make it easy to set up. The fabric on the Aerobase is torrential rain tested providing a waterhead rating of 2000mm and has a UV and fire-retardant treatment on it for good measure. The vents at the top allow for airflow so you can keep the temperatures down inside, while the brow poles help keep the shelter stable. It comes with a deluxe wall included which has a large internal window, with solid and mesh panels which can be rolled back and secured with toggles. A slightly smaller version than it's bigger siblings in the Zempire range, the Aerobase 2 is the perfect shade option for smaller setups. Single point inflation inflates and packs away in minutes Hybrid frame provides stability in the wind 1 x deluxe wall included with solid/mesh window Torrential rain tested TPU tape seam sealed Fire retardant treatment UV treatment 2000mm waterhead rating External top vents for air circulation Stabilising brow poles Single point inflation
