### Details

More of a plate/bowl combination, the Sea to Summit XL Bowl has the same design as the ever popular X Bowl, only 77% larger.

Used as either a big bowl or fold the sides down and use as a plate, the XL Bowl is made with European standard compliant food grade silicone sides securely bonded to a high-temperature food grade nylon.

The larger base provides more area for food preparation and doubles as a chopping board, and the whole thing packs down flat for easy transport.
